

---

## **General Elements of Restoration Pathways (applicable to 4b and 4e plans and BMAPs)**

---

### **1. Water Quality Targets**

**(can be site-specific; establish interim targets)**

### **2. Model / Analysis**

**(can be based on sufficient historical data; simplified modeling such as regression analysis; or complex modeling)**

### **3. Determine Pollutant Loading**

### **4. Management Options / Projects**

**(estimate pollutant reductions from restoration activities)**

### **5. Monitoring and Reporting**

### **6. Documenting Progress**

**(site and pollutant-specific)**

### **7. Commitment to Plan Implementation**
